## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, 30-35 and 40 drawn to a seal package evaluating system, classified in class 73, subclass 12.01.
  - II. Claims 19-29 and 36-39 drawn to a data or a database, classified in class 707, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the seal package evaluation can be achieved without the need for a database, as recited in, for example claim 1. The subcombination has separate utility such as utilization of data or a database for other software applications.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art and the search required for Group II is not required for Group I as

shown by their different classification, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (703) 308-5248. The examiner can normally be reached on Monday-Friday from 8:00 AM to 5:30 PM.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0956. The fax number for this group is (703) 308-7382.

A handwritten signature in black ink, appearing to read 'M. Noori', with a stylized flourish at the end.
